WELCOME TO

Piezography®

Community Edition for Windows

This folder contains the following installers and sub-folders: QuadtoneRIP is required before continuing.

Install Piezography Curves: Run this installer to support all our normal Piezography K6, K7, and P2 (Piezography 2) ink configurations. This installer will place all the appropriate curves inside of QuadtoneRIP curves folder.

Install Piezography HD Curves: Run this installer to support all our normal Piezography K6, K7, and P2 (Piezography 2) ink configurations but with the new high-density UltraHD-MK and HD-PK inks installed in the black position.

Install Piezography HD Curves: Run this installer to support all our normal Piezography K6, K7, and P2 (Piezography 2) ink configurations but with the new high-density UltraHD-MK and HD-PK inks installed in the black position.

Install Piezography Pro Curves: Run this installer to support all our all our Pro ink configurations.

Images: This folder contains targets for checking linearization + special "flush" images for purging ink through your printer lines.

Services: This folder contains a 256 step target for printing and sending to InkjetMall for a custom curve linearization.

Tools: This folder contains the Piezography Linearization checker and other future tools.

The Piezography Manual: This PDF will teach you all you need to know (and then some) about Piezography.

If you have questions or problems, please register at our tech forum at https://community.inkjetmall.com
